

SOP: Contract Renewal

Document ID: SOP-CR-012 Version: 1.0 Effective Date: 2025-09-01

Contract owners must initiate renewal review at least 45 days before contract expiration. Renewal requires reconfirming supplier standing (no open Tier 1 risk findings), reapplying the current Procurement Policy approval threshold based on updated contract value, and reissuing the data privacy clause if the Information Security Policy has been revised since original signature. Contracts not renewed or terminated by their expiration date automatically lapse and require a new full approval cycle to reinstate.
